DALE ROGERS
3529 E GREEN HILLS DR
SANDY UT 84093

Dear Mr. Rogers:

Thank you for meeting with Rody Cox of my staff on April 9, 1993. At the meeting, several issues were discussed, including the water rights and the pipeline at Pitchfork Spring. Currently we are coordinating our response to this situation with the Beaver River Resource Area. We plan to wait for the State of Utah's decision regarding your application to purchase a portion of Section 36 before we decide how to manage the circumstances associated with the pipeline. As requested, the address of the Utah Department of Environmental Quality, Division of Water Quality is, 288 North 1460 West, Salt Lake City, Utah 84114-4870.

On April 9, 1993, an estimate of the surface disturbance on your unpatented lode mining claims, Multicolor Green, Multicolor Green #2 and Multicolor Green #3 (UMC 311606, 328709 and 328710) was made by pacing. The total surface disturbance on Federal land, including new roads, associated with your mining related activities on these claims is estimated to be 6.8 acres. This exceeds the five (5) acre limit for operations permitted by a mining notice and is in noncompliance with 43 CFR 3809.1-4(a). To bring your activities into compliance with Federal regulations, you are required to submit a plan of operations.

The enclosed form may be used for filing a plan of operations. Also enclosed is a map of the area encompassed by your mining claims. Please describe your proposed operation in as much detail as possible, in particular the mine method and sequence of quarry development. Include the type of material being removed and all surface disturbing activities (road construction, drilling, trenching, exploration, stripping, mining, waste disposal, etc.). List all mechanized equipment to be used during the operation and state if any hazardous materials or explosives are to be utilized. List any proposed structures, facilities or storage tanks. Be sure to include proposed reclamation and other measures to be taken to prevent unnecessary or undue degradation

of the lands. Also include measures to be taken if a period of non-operation is anticipated. If the enclosed form does not provide enough space, you may attach additional sheets. Please furnish a map or sketch, showing existing disturbances and facilities. Show the location of areas where surface disturbance and facilities are proposed, include existing and/or proposed access routes. Calculate the total acreage proposed for disturbance (1 AC. = 43,560 sq. ft.).

Should you fail to submit a plan of operations within thirty (30) days after you receive this letter, you will be issued a Notice of Noncompliance followed by appropriate remedial action.

If you need any help in preparing your plan of operations or have any questions regarding this letter, please feel free to contact Rody Cox at (801) 743-6811.

Sincerely,

Dave Henderson
Area Manager
